Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative and the Examiner discussed the claimed invention and the cited prior art, Komura and Akama with respect to claims 1. Dependent claims 5, 7 and 8 have been discussed and referencing to the Specification for clarification. Applicant's representative commented that the second prior art, Akama, although teaches the missing element of Komura's third party server exchanging keying information on behalf of the sender and the receiver, Akama also teaches the sender and the receiver exchanging the data after the verification with the home server whereas Applicant's claimed invention teaches that the sender and the receiver do not communicate with one another. Examiner would reconsider the prior art in response to Applicant's remarks in the next communication but Examiner also comments that this aspect of the claimed feature is well known in the e-commerce applications where the proxy server provides services and resources between the sender and the receiver. Dependent claims 5, 7 and 8 were discussed. Examiner indicates that reconsideration of the cited prior art and/or updated search would be performed upon Applicant's filing of amendment. .
